

AquaKleen Vertical Agitators

AquaKleen vertical agitating washers provide an economical solution to cellular cleaning. Modularized with electric heating coils the system may be located in any location that has an air and electric supply. Systems are available with solution turbulence or Ultrasonic agitation if desired. Stainless steel construction is standard.

Up and down vertical motion provides vigorous agitation to remove chips, oils, buffing compounds, and greases. Stroke and speed are adjustable to provide aggressive cleaning for difficult parts or gentle action for delicate parts.

The platforms are sized to accept standard 12" X 18" baskets. The 18" X 36" platform holds three standard baskets keeping production lots separated for traceability. A wide variety of parts may be processed through these systems.

Standard Features

- Heavy Gauge reinforced tanks
- Sloped Tank Bottoms
- Energy Saving Heat Insulation
- Variable Time Cycles
- Solid State Temperature Controls
- Variable Agitation Stroke
- Variable Agitation Speed
- NEMA 12 Enclosure
- Pneumatic Cylinder Agitation
- Exhaust Fitting
- 12" X 18"; 18" X 24"; & 18" X 36" Platforms available

Optional Features

- Ultrasonic Agitation
- Solution Turbulation
- Oil Coalescing
- Solution Filtration
- Automatic Chemical Replenishment
- Exhaust Blower
- Load & Unload Tables
- Roller Platform
- Insulated Cover
- Microfiltration
- Wastewater Treatment
